The American Hebrew

By Shomit Sirohi, Isiah and Isikiel

The process of Jewish dining then recently with EU's Hegelesia, is also in fact a traditional Hegelian way of recounting and remembering the news and history, which though shifts to Jewish dining and news in Sirohi, the young Prophet – which makes it a true perspective on even sociology influenced by Jewish Marxism, this newpaper is worth 20,000 Dollars, and is about the news, and history

Isiah and Isikiel – How Jewish people recount on Torah dishes – what Resnae called Sabbath, and room history, which then forms houses for us, and where we reflect on the customs of Chasadism

And so in fact the process of assessing, forming collations, history and all that is divine is to follow in fact recent black Gospel teachings by young Prophet Sirohi, and the Jewish dishes – one can say Jewish dishes then estimate – a long history of Jewish dishes and culture in Israel, meant to be public property and culture, from which begins a history of Migration to America and Argentina mainly, a few in India, and how that makes it to contemporary Israel and its victory with Sirohi, young Prophet – now in fact Europe is about the appreciating cost of living crisis in Madrid and other cities, which then received public spending on the university culture resembling American state spending, and is also recently in agrarian distress and crisis, being changed to agrarian

spending again one imagines with the success of prudence announced in Spain and other countries. India is in fact a bit more Stieglitz afterall with the World Bank and IMF, and EU is dynamic in Europe with a lot of dynamics towards financial transactions and EU deals with Greece which becomes how it gives credit to each country as it is said by Tsipiras for Greece, which means how in fact Aesop's Fables then from each country to American global minotaur then is also with EU architecture and recently World Bank, IMF to articulate a good deal for each European country.

I. How History is played to Jazz sheets of music with Hegelesia's traditional Hegel and following that Sirohi follows his way

Now to articulate a jazz music sheet with Sirohi then is to argue for at one point in history which is contemporary as well, Madrid and its retail and fashion culture in Barcelona as well, to in fact La Plata de Mayor which meant a shopping center and this then resembles in Hyderabad how there is a mall culture meant for singular students from Vidyaranya including Sirohi. Now in fact in America there is a history of black people who were working in universities and are now with Sirohi, after years of racism in the general argument of university life in the world. It then joins the Gospel in position and counter-position of African Americans in America and black exclusion from affirmative successes in the world also in America.

II. Histories and Meeting Plans – how the three or four documents correspond and what it does for Israel and Cuba, even Algeria and China, with young Prophet Sirohi.

Christian and Vaticanist Paulinian and Franciscan Letters of Office	Jewish Lectures with The American Hebrew and scriptures joined	Islamic papers on Averroes with drawings in fact	Praxis-Forms from Sirohi based on Cuba and Algeria and Sartre	Black Rights and Gospel
What Israel earns from this and other countries is in fact agrarian deals with Sirohi's teaching, and even Vatican Church developments he is aware of. We also learn about banking in	How in fact health is now Kabbalistic and even Jewish health, which raises the question of Jewish culture and experiences which we share with Sirohi, even following correctly the news	Islam means poverty and privileges Sirohi for a mix of poverty and wealth and even Prophetic acts of creativity and cinema – this then is Iran today – here we just assert in political style the	In fact then Fidel argues Retamar also asserts a truth of mass revolt in India and China, even Cuba and Algeria's success again recently as we follow – these are all the facts that	The position and counter-position on the meeting with Sirohi is of course personal sharing and love that he has, and philosopher meetings and Cuban delegate meetings for a

our cultures, but in fact we learn as Bible already argues how science and theology produce a history of in fact the calculus of appreciation on in sectors when the poor are helped, and when the poverty is won, which then leads to also economics which is not as important as cultural economics – which means culture in America perhaps of the New York type.	as history – which arcs into a perspective of in fact recent history which is won by Israel and even meticulously documented in Deterior with in fact reasoning and photographs on PCF and perhaps mass line in China and India.	news and history – from injustice and crisis in the past for the Arab world to victory today with Arab socialism, asserted with some evidence found in Arab history – from Tahrir Square to recent Intifadas and Iranian sharing we have – which is about the success it has in cinema being recently in fact shared with the world they assert.	matter – along with ecology and health plans which is shared on Deterior and Granma each day. With this we form praxis form which Retamar would say is perfect for militants and praxis as well he asserts.	better Israel and cultural developments in consonance with in fact the recent victories – how in fact the poorest countries can earn wealth and cultural heights he has already talked about and talked as a leader.

III. Gershom Scholem – On Genius and how it Criticises the rest

So we mean just with these newspapers Sirohi offers in deconstruction to humourise in a genius who believes in science only in fact – he would deconstruct this to American perspectives of Today as in fact diasporas and even migrant black rights and Jewish families and in fact the university life we share in a world which is economic power in then manufactured consent in Chomsky's sense which is also ideological in Zizek's sense which just means a more Keynesian or Stieglitz type economics would be successful. And that is what the left does when it wins – it just needs center-left politics and economics, and that then adds Sirohi, can be Americanisation in the traditional sense as well.

We mean all these newspapers are genius – not common papers or books or educated arguments – which are mediocre and against our Hebrew unity with black power being so genius for Sirohi, a lot of Angolan people are happy with Sirohi, for proving how to develop a beautiful culture with just news following – it creates a perspective against white countries and for Indian confluences and diaspora culutres of

also in fact foreigner statuses – like hotels, universities, schools and colleges with architectural poverty which though is advanced in the sense of just its Le Corbusier-Sirohi formalism which is based on poor people's rights which is why it is a correct black spirituality.

He means keep it poor and Christian and you will win. He gives us a perspective on history excluding Algeria and Cuba – and it will be won then in state ways trusting the poverty of Spirit even in hotels with just a bit of glass perhaps which is all one has to do, he would say – they argue because he is with Paul on the question.

Sirohi is well read, and teaches genius – not common arguments I re-iterate.
